GUTTER MACHINES

SHOP OUR GUTTER MACHINE LINE AT
BUYMBS.COM

KWM
Gutterman^{INC}

5" and 6" Ironman Gutter Machine

- Polyurethane Drive Train
- Rollform 24 gauge steel
- Eliminates slippage from cold weather & condensation
- Eliminates the need to load coil prior to transportation (less material waste)

Run Out Stand

1 for every 20' of coil

- Quickly adjusts from 28 3/4" to 45 1/4"
- Bottom legs fold up for easy storage
- Deluxe Stands feature roller tops to easily slide machine into place

5" Mach II Machine

6" Mach II Machine

5 & 6" Combo Mach II Machine

- Polyurethane Drive Rollers
- Stainless Steel Forming Rollers
- Push Button RUN/JOG Controls at Entry & Exit Ends
- Forward Pulling, Easy Cut Shear
- Power Interruption Safety Circuit
- Two 360° Rotatable Reel Stands with Easy Lift Reels
- Electric Motor 3/4 HP, 110 VAC, 60 Hz, 1 Phase, 11 amps
- Welded Tubular Steel Frame
- Industry's Best Warranty

BRAKE SYSTEMS

Tapco **PRO14**TM
10'6" PORT-O-BENDER
TPRO1410

IN STOCK!

- 14" (35.6 cm) throat depth with patented large inside working pockets and a 2 3/8" (6 cm) mouth opening
- Lightweight, high tech anodized alloys and computer designed die castings for strong, durable performance
- Patented "Moving Pivot Hinge", the world's most advanced hinge design, for unparalleled bending performance
- Fast, strong, positive clamping

Tapco **PRO19**TM
10'6" PORT-O-BENDER
TPRO1910

IN STOCK!

- 19" (48.3 cm) throat depth—largest in the industry for more efficient bending
- Stores material inside bender—reduces handling and flipping of material and speeds up bending
- Lightweight, high-tech anodized alloys and computer designed die castings
- Patented "Moving Pivot Hinge" increases bending power without marring material

Tapco **integrated tool systems**

WINDY SPECIAL

IN STOCK!

10'6" Port-O-Bender TW1410

- Locking system design provides more clamping power with less effort. Locks on a wider variety of material thicknesses with no need for adjustments.
- Stainless steel bending edge.
- Accurate built-in depth gauges.
- Full 14" throat depth.
- Available in 8'6" and 10'6" lengths

Tapco **integrated tool systems**

Van Mark

10'6" MARK IITM TRIMMASTER CONTRACTOR

TM10

IN STOCK!

- Power LockTM bar provides stronger clamping along the entire bending edge for crisp, clean bends without oil canning or warping
- Increased bending radius. Make 180° hem bends easier than ever.
- Make smaller "J" channels
- Make hollow core hinge extrusions for added strength

10'6" METAL MASTER[®] 20 CONTRACTOR

MM1050

IN STOCK!

- Strongest computer engineered castings for unmatched strength
- Deepest throat available for working with wider materials
- Dual hollow-core Power LockTM bar for better clamping force
- Increased bending radius. Make 180° hem bends easier than ever.
- Adjustable clamping jaws with the largest opening in its class
- Ergonomic heavy-duty bending handles for improved leverage

10'6" TRIM-A-BRAKE IITM

T1050

IN STOCK!

- Light-weight brake loads into the truck quickly for use of multiple crews
- Requires little set-up or maintenance
- Hinge pocket helps prevent scoring damage to components
- Ridge "I" beam base rails ensure brake stays in calibration
- Full loop handle provides uniform bending along entire piece
- Material stops allow repeat bending without re-measurement
- Break has 3/8" x 13" throat & vinyl strip for protecting material

10'6" MARK I SERIESTM

M10

IN STOCK!

- Fewer parts resulting in along trouble-free service life
- No need to adjust this break daily, or even monthly as the unique cam locking feature clamps to the thickness of the material
- Power LockTM bar provides stronger clamping along the entire bending edge for crisp, clean bends without oil canning or warping
- Increased bending radius. Make 180° hem bends easier than ever.

TRIM-A-TABLE TAT60TM

TAT60

IN STOCK!

- 6 foot Saw Boom: Allows cuts as shallow as 2/12 pitch

Steel Legs part #3001 sold separately
Saw not included

SAFETY EQUIPMENT

ATTENTION ROOFERS AND FRAMERS!
New OSHA Directive For Residential Fall Protection
Enforcement Effective Date: JUNE 16, 2011

FROM OSHA:
OSHA INSTRUCTION

DIRECTIVE NUMBER: STD 03-11-002	EFFECTIVE DATE: December 16, 2010
SUBJECT: Compliance Guidance for Residential Construction ENFORCEMENT DATE: June 16, 2011	

For complete details to OSHA Directive
STD 03-11-002 please visit:
www.modernbuilderssupply.com

Under the current 29 CFR 1926.501(b)(13) workers engaged in residential construction over six (6) feet above the ground level are to be protected by conventional fall protection. For roofers, the 25 foot, ground-to-eave height threshold no longer applies, nor do slide guards as an acceptable form of fall protection, regardless of the roof pitch or height of the roof eave. This directive includes framers as well.

Get compliant with our **Bucket of Safe-Tie**
available and in stock at all MBS locations

IN STOCK!

Bucket of Safe-Tie

- Universal harness HUV (01101) with 5 points of adjustment for added comfort
- Vertical Lifeline Assembly with Shock Pack, and permanently attached Positioning Device with 18" lanyard extension to keep device within reach
- Your choice of anchors

Item Number	Description
