Dura-Tech™

- Alaskan Yellow Cypress, rot resistant
- Dura-Tech offers the strength & rigidity of wood with the low maintenance attributes of PVC components.

Composite Adjustable Sill

- These technologically advanced sills are made up of all-composite substrates, synthetic caps and nosing. These integrated materials prevent the sill from rotting, warping, or deteriorating over time.

All doors have steel reinforcement plates

- For additional security

All doors are double bore standard

- Adds protection and security

Permanent waterproof adhesive

- Lifetime rot resistant

Ball Bearing Hinges

- More durable, better performing and less noisy than standard hinges.

Pre-finished doors are paintable

- Protected by UV resistant topcoats

Masonite Interior Doors

Molded Panel Doors from Masonite are more durable, and resist warping, shrinking, and cracking better than solid wood doors. All doors come primed for easy finishing in a variety of widths and heights.

Best of all, no old growth timber is harvested solely for the production of Molded Panel Doors from Masonite. By-product wood chips and timber from sustainably managed forests are used by facilities with a commitment to environmental excellence in every step of the door manufacturing process.
